

Dear F.C.C., Small broadcasters in small markets would suffer greatly if we were required to set up expensive recording devices and maintain the proposed length of storage. No telling how much just the equipment and the tapes or discs would cost, let alone the man hours to document, store and rotate these recordings. Most broadcasters in our small group run with small profit margins and this financial burden would eat up a great deal of those dollar...which we desperately need to put back into our operations for better digital broadcasting equipment.

Thank you for reading my comments.
Bob May, GM, KDKD Clinton, MO.
